

First phase of strike scenario in sight

Unless real progress is made at the negotiating tables, the first strike days for CSQ members and their Common Front partners will be during the week of October 26, at a rate of one day per region.

The strike calendar includes a range of increased pressure tactics, notably activities that will create economic turmoil in the regions, as well as sufficient time slated for negotiations. If at the end of this first phase the bargaining tables have no settlement in sight, other scenarios will be considered as of November 9.

Talks are getting nowhere fast

One year of negotiations has passed since union demands were tabled and that talks with the government, regarding several important issues, remain at a stalemate. Think notably of salary offers, changes to the retirement plan, job insecurity, recourse to the private sector for service delivery, and deterioration of professional autonomy.

These additional pressure tactics will allow the CSQ and its Common Front partners to maintain pressure on the government to obtain a negotiated agreement for improved work conditions, protection of our gains, and guaranteed access to public services for the population.
